LED Lights  
With retails stores accounting for 90% of our total energy consumption, we continued to increase the numbers of stores with LED lighting to over 100 stores at the end of this fiscal year, representing 79% of the retail shop footprint.  
  
Almost 100% of our office space is installed with energy efficient lighting (T5 or LED). 100% of our logistics centre is also LED lit.

2  
Charter on External Lighting  
Sa Sa is one of the early adopters and signatories of the Environment Bureau's Charter on External Lighting, a charter that urges retailers to switch off external light to minimize light pollution for nearby residences. Sa Sa has an established policy and timer in place to ensure that the external lighting systems of all our relevant stores are extinguished after 12 midnight or earlier as is practical. 48 stores received gold awards for recognition.

3  
A Greener Logistic Facility  
Various environmental standards have been incorporated into the interior design to minimize our environmental footprint wherever possible. These standards include:  
  
- Installation of a variable refrigerant flow (VRF) air conditioning system, which is designed to be approximately 48% more energy efficient than a conventional one  
- Interior spaces are separately zoned to enable independent control of air temperature  
- Full installation of LED lighting  
- Additional cotton insulation on the ceiling to reduce thermal conductivity and the installation of a propeller fan to enhance air movement, resulting in more efficient temperature control

4

Beginning in mid 2019, our stores are required to switch off their card readers during non-operational hours to save up 3% of our total energy. We have also installed smart meter to monitor our electricity consumption in real time.
