<p>Electricity Consumption The Group has formulated our environmental measure with a focus on ensuring full compliance with applicable legislation and requirements by promoting environmental awareness among staff, disposing waste in an environmentally responsible way, and reusing and recycling materials. Renovating and upgrading existing hardware can generate both environmental and cost reduction benefits. The Group continuously monitors and reviews the effectiveness and performance of its appliances, replacing any dated or inefficient systems with up-to-date energy saving technology. At May 2016, we replaced all T8 & T12 fluorescent lamps with T5 LED lamps. Installation of air-conditioning with "Grade 1" energy label, raising the temperature set point of 1°C could reduce energy consumption by around 3%. Switch off the computers after office hours can save up to \$600 electricity cost for each computer each year. Installed a conventional "Exit" sign with LED "Exit" sign can save up to \$220 of electricity cost per year. During the 1 hour lunch time and when leaving office, the last-man-out to check and switch off the power source to all air-conditioning, lighting and office equipment that are not in use.</p>
